# TOSHIBA

Our next generation multi-functional range offers you the ultimate in versatility.

*Using the latest technology these quality machines not only fax, but can print, copy and scan too.*

*Whatever your requirements, Toshiba has the solution.*

## Multi-function

### DIGITAL DP80F Multi-function Manager

#### Versatility

Toshiba's DP80F is a state of the art digital fax. Whether you need to send faxes quickly, or carry out high speed printing, this sophisticated machine offers convenience and quality.

#### Fax, Printer, Copier and Scanner

With the standard Toshiba Viewer software you can connect the DP80F to your PC and transform it into a printer, copier and scanner as well as a fax. You can print documents directly from your PC (operating under Windows 95™, Windows 98™, Windows 2000™ or Windows NT™) at an impressive 8 pages a minute with a resolution of 600 dpi. Copy and scan are also possible at 400 dpi. In addition you can send faxes from your PC, electronically archive and print out faxes you have received.

#### Speed Dialling and Fast Transmission

The DP80F allows up to 138 abbreviated dialling codes, including 38 one touch keys to enable your regular fax recipients to be stored for faster despatch. It also has a broadcast facility allowing convenient despatch of originals up to 25 variable groups.

#### Memory

The DP80F has a standard 1.5MB memory that can store 100 jobs for retrieval later, making it ideal for situations where secure reception is needed at busy times and weekends.

#### Reporting

Transmission reports can be printed with an image of the original document you have sent. The DP80F will also print the exact time of receipt on faxes that you receive and even insert separation sheets between faxes, to save you time having to separate faxes from one another. With the optional network connection from your PC you can see the status of all fax jobs and error messages.

#### Paper Technology

In addition to the 30 page document feeder, a 250 sheet cassette and the single sheet front feed bypass, there is an optional 500 sheet cassette, enabling you to print automatically whilst keeping the first cassette free for incoming faxes and other jobs.

### DIGITAL

### DP85F High Speed Digital Fax

#### Versatility

Toshiba's DP85F state of the art digital fax can change the way your office documents are produced forever. Whether you need to send faxes quickly, carry out high speed printing or copying, this sophisticated machine will make a good impression.

#### Fax, Printer, Copier and Scanner

With the standard Toshiba Viewer software you can connect the DP85F to your PC and transform it into a printer, copier and scanner as well as a fax. You can print documents directly from your PC (operating under Windows 95™, Windows 98™, Windows 2000™ or Windows NT™) at an impressive 8 pages a minute with a resolution of 600 dpi. Copy and scan are also possible at 400 dpi. In addition you can send faxes from your PC, electronically archive and print out faxes you have received.

#### Speed Dialling and Fast Transmission

The DP85F allows up to 188 abbreviated dialling codes, including 38 one touch keys to enable your regular fax recipients to be stored for faster despatch. It also has a broadcast facility allowing convenient despatch of originals up to 50 various groups. In addition the built in 33,600 bps modem, can transmit original documents in 2 seconds, consistently reducing telephone costs.

#### Memory

The DP85F has a standard 3.5MB memory that can store 100 jobs for retrieval later, making it ideal for situations where secure reception is needed at busy times and weekends.

#### Reporting

Transmission reports can be printed with an image of the original document you have sent. The DP85F will also print the exact time of receipt on faxes that you receive and even insert separation sheets between faxes, to save you time having to separate faxes from one another. And with the optional network connection you can see the status of all fax jobs and error messages from your PC.

#### Paper Technology

In addition to the 30 page document feeder, a 250 sheet cassette and the single sheet front feed bypass, the DP85F has an optional 500 sheet cassette, enabling you to print large documents automatically, whilst keeping the first cassette free for incoming faxes and other jobs.

### DIGITAL

### DP120F True Network Faxing Power

#### Versatility

Toshiba's DP120F is a true state of the art digital fax that can be transformed into a printer, copier, scanner and even an Internet fax.

#### Fax, Printer, Copier and Scanner

With the optional PCL 6 printer card and network interface the DP120F becomes a true network printer. The built in print server provides a direct connection to your PC, even in a peer to peer environment.

The software enables you to print (from Windows 95™, Windows 98™, Windows 2000™ or Windows NT™) at a remarkable 12 pages a minute at a resolution of 600 dpi. You can also copy and scan documents at 400 dpi in a matter of seconds.

#### Speed Dialling and Fast Transmission

The DP120F has a 3MB memory to store up to 100 jobs. It also allows up to 373 abbreviated dialling codes, including 73 one touch keys. In addition the Super G3 ready DP120F saves you time and money with a transmission time of only 2 seconds.

#### Paper Technology

The high paper volume and choice of different cassettes for printing simplifies your work. The DP120F boasts a 550 sheet cassette,

optional 2 x 550 sheet cassettes and a 100 sheet bypass feed enabling envelopes or paper with a weight of 150gsm to be used.

#### Internet Fax

The truly multi-functional DP120F is also able to send faxes and e-mails via the Internet. They are transmitted immediately via your mail server and transmission records are prepared. In addition it can store fax numbers as well as e-mail addresses that can be downloaded from an e-mail server or PC.

#### Reporting

With the optional bypass, the DP120F will print your transmission reports at A5, including an image of the original document. In addition the last 150 transmission records can be reviewed afterwards. The DP120F also prints the exact time of receipt on faxes that you receive, outputs them in the correct order and even inserts separation sheets between faxes, to save you time.
