PLANETPRESS® SUITE

Transactional and Variable Data Printing Package

Transactional and Variable Data Printing Package

PlanetPress® is a complete and fully integrated software suite that enables easy production of variable content documents on your Toshiba e-STUDIO Multifunctional Device (MFD). You can import data and design the layout of documents with no image or colour restraints and simply print very high quality at the optimum print speed of the MFD.

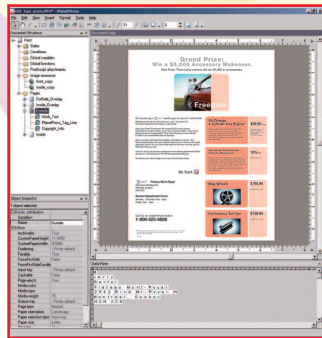

Invoices or statements can be produced simply and quickly. You can eliminate multi-part business forms using this package, making bursting or decollating and managing an inventory of pre-printed forms redundant, saving time, trouble and money. Financial documents are a breeze and you can even print barcodes and labels. Shipping and warehousing dockets can be printed on demand.

PlanetPress® also allows you to personalise all your promotional literature, whether they are for unique mailshots or generalised advertisements. Using full colour or mono print, you can tailor communications so that you give each individual customer information unique to them using high-speed mail merge. You can eliminate pre-printed fliers and reduce the marketing costs associated with printing while ensuring that your sales message is targeted and personal for each and every recipient. Added to all these benefits are the advantages of advanced workflow and output management features.

PlanetPress® delivers a powerful, low cost, high-speed variable content printing solution

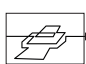

Using all five primary modules PlanetPress® delivers a powerful, low cost, high-speed variable content printing solution that also offers automated document distribution and management, integrated digital archiving, automated conditional fax delivery and real-time search capabilities.

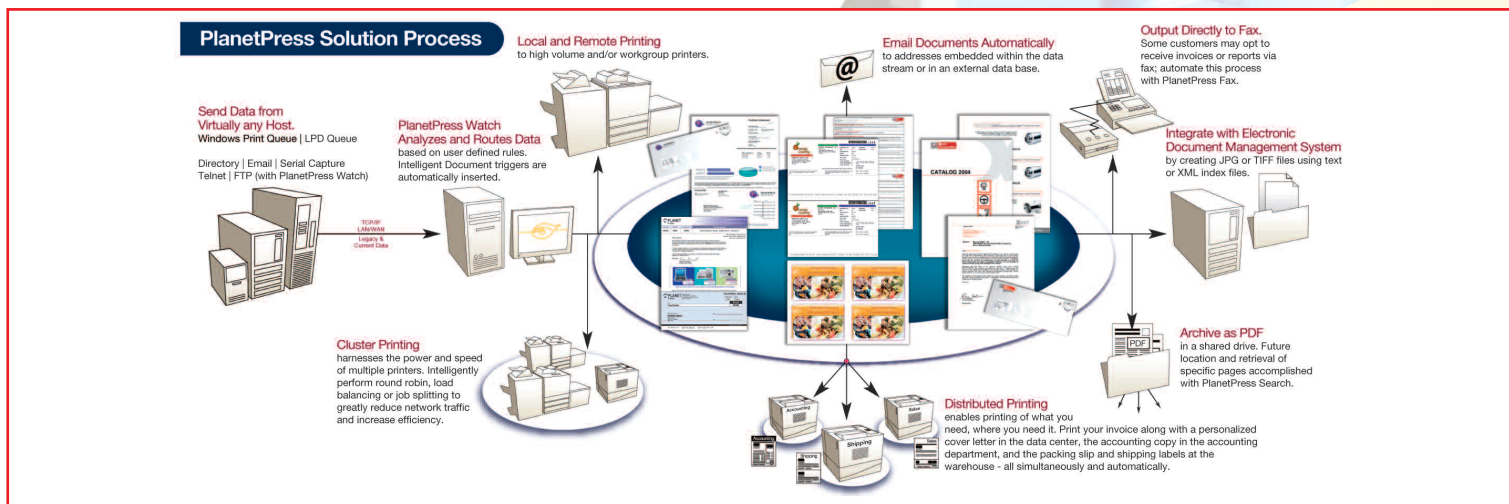

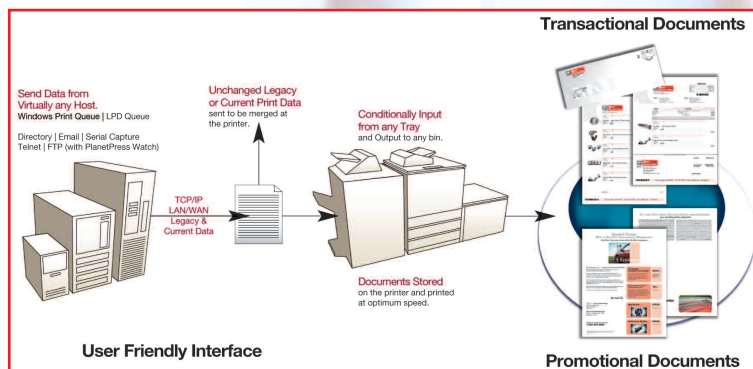

PlanetPress® is the most complete, capable and flexible variable data application available and will transform your e-STUDIO MFD into a high quality print production resource for all your business print needs, from shop floor and warehouse to general office, print room, accounts and marketing departments.

PlanetPress® works within your existing hardware and software infrastructure, integrates with your existing data and is fully scalable, growing as your needs expand. The user interface has been designed for maximum ease-of-use and features WYSIWYG formatting, drop and drag graphics, integrated colour management and password protection on source files.

PlanetPress® consists of five primary modules:

-  **PlanetPress** - Powerful and simple variable data document design/production, this is the cornerstone of the complete package
-  **PlanetPress Watch** - Automated document distribution and management captures and routes documents to multiple destinations
-  **PlanetPress Fax** - Fax transmission direct to/from a fax server or modem
-  **PlanetPress Image** - Integrated digital archiving automatically generates PDF/TIFF/JPEG files for email or archive
-  **PlanetPress Search** - Automated database queries on PDF archives
